

Sankarampadi Aravamudhan

Conference Presentations Of S. Aravamudhan: A Monograph of the Papers

The contents are the presentation papers at Conferences, Seminars and Symposia. The biological NMR is the main theme. The emphasis in the contents of this book has been on the advantages of calculating anisotropic full tensor value of Chemical Shift instead of only the isotropic value, and show that such calculations are easy to carry out. The molecules considered have been small molecules relevant for biological macro molecules. The Scientific events included in this collection include Indian Biophysical Society (IBS) Meetings and National Symposia on Chemistry (NSC)(Chemical Research Society of India-CRSI) A few papers on the more general aspects of education and science. The duration of these events is from year 2006 onwards.
